Duracell continues to introduce innovative, reliable power solutions for the electronic devices that are integral to today’s mobile lifestyle. The Duracell myGrid provides drop-and-go recharging for wireless smart phones by simply placing up to four phones on the charging surface. Adding to the versatility of myGrid is the new myGrid USB Charger, which allows individuals to continue using their electronic devices by providing hours of extra plug-and-go power.

The myGrid USB Charger delivers supplementary power for more use-time for hundreds of popular devices such as smart phones, e-readers, MP3 players, portable gaming devices, GPS units and Bluetooth® headsets.

- The compact size makes it ideal for travel and convenient to have on-hand as an everyday accessory for reliable supplemental power.
- This handy charger is USB, mini-USB and micro-USB compatible.
- The Smart charge indicator shows power level.
- The myGrid USB Charger can provide at least:
  - 4 hours of extra use-time on smart phones such as the iPhone and latest BlackBerry® models
  - 100 hours of reading on e-readers such as the Kindle™
  - 10 hours on Bluetooth headsets
  - 30 hours on MP3 players
- To recharge the myGrid USB Charger, users simply drop the device onto the compatible myGrid charging pad or connect it to their computer through USB input.
- As an option, electronics users can also choose the Duracell Instant USB Charger, which is recharged by connecting to a computer rather than the myGrid charging pad.
About Duracell myGrid Technology:

• The myGrid USB Charger is the newest addition to Duracell’s portfolio of power solutions for today’s mobile lifestyles.

• The 1800 mAh device uses a Lithium-ion rechargeable battery to keep users connected to their devices away from the power grid.

• The myGrid USB Charger is compatible with hundreds of devices with USB, micro-USB and mini-USB ports.

• More information on myGrid is available at http://www.duracell.com/mygrid.

Availability:

The Duracell myGrid USB Charger, myGrid charging pad and Instant USB Charger are available at major retail and online stores throughout the U.S. and Western Europe.
