

In 1953, Cascade® entered the automatic dishwashing market with claims of “spotless dishes” to the 4% of households with dishwashers. This fast-moving world of household innovations was just in its beginning stages, and Cascade stayed at the forefront for the next 50 years by developing a range of automatic dishwashing products perfect for families, needs, and lifestyles. Today, with decades of experience and dishwashers in more than 60% of households, Cascade continues to grow, striving for immaculate dishes every time with its brilliant automatic dishwashing powders, gels, tabs, and additives.
